Hiring Committee

RBC – Technology & Operations

Toronto, ON

Dear Hiring Committee,

I am writing to express my interest in the Fall 2025 Quality Engineering & Automation Co-op at RBC. As a Business Intelligence student at Algonquin College with hands-on experience in automation, data analytics, and dashboard reporting, I am excited about the opportunity to contribute to RBC's innovative Technology & Operations team.

During my time at Anvesak and Magic Software, I developed automated workflows using SQL, Python, and Excel (including VBA and macros), and created Power BI dashboards that helped streamline reporting and support data-driven decisions. These experiences also gave me exposure to Agile environments, data integrity validation, and process optimization—aligning well with the expectations for QA and automation roles at RBC.

I have a strong interest in test automation and quality engineering and am eager to apply my technical knowledge to support testing processes, enhance reporting automation, and contribute to RBC's digital transformation. My communication skills, developed through both team collaboration and customer-facing roles like Tim Hortons, enable me to bridge technical insights with business needs effectively.

Thank you for considering my application. I would welcome the opportunity to bring my passion for data, automation, and problem-solving to RBC's team. I have attached my resume and would be happy to discuss how I can add value in this role.

Sincerely,

Tushar Chaudhary
